

Gustavo Ben Abraham

JUNIOR BACKEND DEVELOPER

São Paulo, Brazil +55 (11) 97986-5999 gustavobenabraham@gmail.com [LinkedIn](#) [GitHub](#) [Portfolio](#)

PROFESSIONAL SUMMARY

Entry-level backend developer building practical experience through personal projects. Focused on Java, Spring Boot, REST APIs, and PostgreSQL. Seeking a junior opportunity to contribute to a collaborative team, keep learning, and help deliver reliable software.

TECHNICAL SKILLS

Backend: Java, Spring Boot, REST APIs, layered architecture, Controller/Service/DTO

Development: global exception handling, third-party API integration, pagination and filtering

Databases: PostgreSQL, SQL, Flyway

Tools & Web: Maven, Git, GitHub, JavaScript, TypeScript, HTML, CSS

SELECTED PROJECTS

Task Manager API

Java · Spring Boot · PostgreSQL · Flyway · Maven

- Built a REST API for task management using a layered architecture and global exception handling.
- Personal project focused on reliability, code organization, and backend development practices.

Pokédex Full Stack

Java · Spring Boot · JavaScript · REST API

- Integrated an application with the PokéAPI, adding pagination and filters and separating responsibilities across Controller, Service, and DTO layers.

ENTREPRENEURIAL EXPERIENCE

Founder & Operator — Algoritmo Doce

Small business · Present

- Founded and run a small gourmet brigadeiro business, managing its digital presence and promotion.
- Handle customer communication and orders, strengthening organization, autonomy, and communication skills.
- Built the business website with TypeScript, Vite, HTML, and CSS to support its brand and make it easier for customers to place orders.
